

DevOps Rocket

The Offering At-a-Glance

The DevOps Rocket is an Enterprise Technology Transformation “Phase Zero” engagement designed to jumpstart your DevOps Journey to Excellence. Our DevOps Coaches will come to your location, interview your business and technology people, and work with your corporate leadership team to maximize your DevOps investment.

BENEFITS:

- Definition of Current State of DevOps
- Roadmap to Future Success
- Daily DevOps Coaching on Key Concepts and the DevOps Mindset
- Sows the Seeds for Cultural Change

The primary characteristic of DevOps is increased collaboration between the roles of development and operations. There are some important cultural shifts, within teams and at an organizational level, that support this collaboration.

- Rouan Wilsenach, “DevOps Culture”, 9 July 2015

Are You Ready to Start Your DevOps Journey with a Rocket Ride?

You know that you need to get started with DevOps. You might even have already tried to start your journey on your own, but you are struggling with getting the proper traction and seeing the proper results. Or maybe you have completed an Agile Transformation and DevOps is next on the list. Whatever the case, we’ve got you covered.

If you think you are ready to jump aboard, with DevOps Rocket, you can:

Get Your Arms Around Your Current State

Our coaches will meet with your business people and technology people. We’ll conduct interactive sessions to identify, and quantify, challenges with people, process and tools in the current DevOps landscape. Our coaches have led DevOps transformations in multiple industry verticals.

See What’s Possible with Modern DevOps

While on site, our DevOps Coach will provide a daily lunch session focused on one or more DevOps topics. We have often found that these sessions are absolutely crucial to kickstarting the DevOps mindset and a culture of automation, continuous improvement and creativity. Common session topics include:

- Introduction to DevOps
- Continuous Integration, Delivery and Deployment – Automating Excellence
- Modern Release Patterns and Practices
- DevOps Tools Demo

Plan Your Journey to Operational Excellence

A DevOps Transformation, or any transformation for that matter, is not a small undertaking. Getting an expert recommendation about where to begin and what steps to take in a phased approach are the reasons why you bring us in, and the Roadmap Deliverable is absolutely crucial to justifying your investment and achieving operational excellence.

Understand the Organizational Enablers for Success

We understand the changes that need to happen in your organizational culture, communications, and leadership. Even at the early stage, we will begin coaching your team how to navigate the challenge of change.

DevOps Rocket

Your Success Is Our Success!

We understand that bringing in an external consultant is a considerable investment. We consider your trust a badge of honor and will work tirelessly to reward your choice to hire us. We will start from the very beginning, providing a roadmap that contains specific phases and actions to address all elements of your DevOps Transformation.

Communication

- **Leadership.** We will work hand-in-hand with your business and technology leaders to position you for success.
- **People.** We will provide the expertise and resources required to enable your people to internalize and deliver on the vision for DevOps excellence.
- **Process.** We will examine your internal processes, recommend improvements and set the tone for a culture of automation.
- **Tools.** We will make recommendations based on what we learn about your company, if you have not yet chosen your tools. If you have chosen your tools, we will work with your people to upskill their way to proficiency.
- **Communication.** We will work with your people at every level to enhance the communication required to maximize the benefits of the DevOps mindset.

Commitment

The DevOps Rocket requires an investment of \$27,500. A deposit of only \$5,000 reserves your spot!
